

SAFETY POLICY

"We are committed every day to ensure the safety and health of our employees in the performance of their activities"

FARAVELLI commits to supply:

- ▶ comply with current regulations concerning workplace safety and worker health;
- ▶ make available adequate resources to implement preventative measures to avoid incidents and occupational illnesses;
- ▶ consider worker health and safety as essential and indispensable when establishing its operations, including planning, management and scheduling of cleaning operations and maintenance of workplace areas, working tools, equipment, and instruments;
- ▶ establish safety procedures and practices; and train, inform and provide knowledge to workers on their job to ensure that work is carried out competently, responsibly, and with awareness;
- ▶ promptly answer efficiently and diligently to the emerging challenges during work;
- ▶ promote cooperation and communication within the company functions and between Faravelli and the external stakeholders, like competent authorities, certification bodies and trade associations, to protect the health of third parties and the community.
